Veronique was born in the South of France, in 1965, where she grew up in the sun and the famous light of Provence Côte d'azur. From an early age she developed a strong interest in Art and met many contemporary young artists like herself who were influenced by Cezanne, Matisse, Miro, Armand and Picasso. She studied Art and decoration at the "Villa Thiole" in Nice, followed by a year in the "Academia delle belle arte" in Milano. For a while she lacked the belief in herself to display her work in public but after becoming a mother she found the confidence to go forward....the result can be seen in her first exhibition in Hong Kong.
